**C. Research support.**

National Institute of Health, National Cancer Institute (Pilot study funds via 2U54CA132384-06A1)

Thompson, Caroline (PI)

02/01/2016-07/31/2016

Visualizing socioeconomic and racial disparities in the burden of screening detectable cancers

Overall Goals: For this pilot project, we will develop a web-enabled mapping tool using GIS technology combined with California Cancer Registry data, US census and waves of the American Community Survey describing sub-regional areas by contextual factors and detailed metropolitan and regional geography.

Role: Co-Investigator

Colgate University, Discretionary Research Grant

03/01/15-05/09/15

The goal of the project was to obtain the software HLM 8.0 as well as literature in the service of mastering hierarchical linear modeling for future research projects examining the influence of neighborhood context onto individual health outcomes.

Role: PI

University at Albany, SUNY, Benevolent Association Research Grant

05/01/12-08/15/1w

Developing and evaluating the effectiveness of the location-based offender monitoring system for offender supervision

The goal of this project was to collect interviews of staff members of nonprofit community-based organizations in northern New Jersey to determine how neighborhood context impacts their service provision.

Role: PI
